PowerBase™

CHLORINATION UNIT

PPG Industries, a leader in safer, simple and accurate chlorination, introduces the *PowerBase* chlorination unit incorporating the *Accu-Tab* chlorinator and tablets. This unique combination provides a better chlorination alternative for commercial swimming pool installations.

PowerBase chlorination units are:

- Easy to install
(only two plumbing and two electrical connections!)
- Engineered for below grade or above grade filter rooms
- Compact
- Easily adapts to chlorine controllers
- ETL Listed (*electrical components*)
- Dependable operation
- Reliable chlorine delivery
- 4 models - sized to meet your requirements

Built to high quality standards:

- Features patented *Accu-Tab* chlorinator technology (*NSF 50 certified*)
- Sta-Rite® 1 HP, JSAEL (*model 3012*) and 1 1/2 HP, JSAFL (*all other models*) injection pump
- Polyethylene balance tank with float valve and high limit safety switch
- Blue White® flowmeter, adjustment valves, and check valve
- Brass solenoid for use with controllers
- Pre-plumbed using Schedule 40 PVC pipe
- Prewired to 110 volts with electrical relay
- Custom-welded aluminum frame

PowerBase™ chlorination unit using
Accu-Tab® chlorinator model 3075.
